

# Print Size Guide.

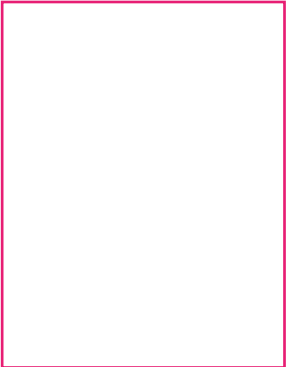

When creating the artwork for your printed materials, you'll need to include an additional 0.25" along each edge to allow for the bleed and safe zone [LINK HERE TO BLEED GUIDE]. You'll also need to include graphics at a minimum of 300dpi (dots per inch) in order to ensure the printed version is sharp and top quality.

The table below will help you to set up your design document according to your desired finished page size, whether you need to set it up using length measurements (inches) or pixels (to create a minimum 300dpi image).
